

Matteo Cenerini

●—|FLIPPERKASTAUTOMAT

for

bass clarinet, cello and piano

duration: ~ 9'

April 2023

General Notation

Accidentals: all accidentals affect only the immediately following note.

 **p** = crescendo from silence.

p  = diminuendo to silence.

 = Tremolos as fast as possible

Bass Clarinet

The bass clarinet is written in the score with transposed notes, the treble clef transposes a major ninth above the actual note while the bass clef transposes a major second above the actual note.

= Multiphonics: there are two multiphonic sounds in the piece to be played through the indicated fingerings.

= Keyclicks.

= Keyclicks fingerings: note heads in square brackets indicate keyclicks to be performed with non-ordinary positions.

= Key rattle: keyclicks tremolo, as fast as possible, choose freely very resonant keys.

= Air sound: blow into the instrument without vibrating the reed. The pitches given refer only to the fingering and not to the desired sound.

= Breathe in/out: Inhale or exhale air from the instrument, rather sonorously always without vibrating the reed.

= Key Release: Release the key as quickly and as sonorous as possible.

= Keyclicks + air.

= Teeth on reed: put the teeth on the reed to produce sharp, unstable sounds with random and variable pitch. The given pitch refers only to the position and in no way to the resulting sound.

= Harmonics cluster.

Growl: While continuing to play, sing the indicated note into the instrument

Cello

- Preparation

-Insert a plastic ruler about 16 cm long between the strings of the instrument as shown in the picture, i.e., below strings I, II and IV and above string III, so that the second string remains open.

Insert the ruler slightly asymmetrically by making a larger portion of it protrude on the right side of the instrument so that it is easier for the performer to move the ruler with the right hand.

ruler in position "1"

In the piece it will be asked to move the ruler vertically by defining three positions:

- 1 - between fingerboard and bridge just after the end of the fingerboard (starting position)
- 2 - in the middle of the fingerboard (about A2 on IV string)
- 3 - near the capo (about D2 on IV string)

- Tools (card)

A hard plastic card is needed, like a credit card, which will be used, as a pick, to pluck the strings in their portion between ruler and bridge.

- Notation

All notes with the stem at the top = are played (with bow, card, pizz, or tapped) with the right hand
 All notes with the stem down = refer to percussion or tapping with the left hand
 (the ruler is always plucked, moved or stroked by the right hand).

= Exerting exaggerated pressure on the string to obtaining a scratched and distorted sound.

any pression

= Bow the strings very lightly, avoiding, as much as possible, to vibrating them. Produce a very weak and unstable sound, like rustling.

= Damped: prevent vibration of all strings with the fingers of the left hand.

= Percussive Damp: Stopping the strings by a percussive gesture with all the fingers of the left hand on the fingerboard, to produce a dry stroke with no perceived pitches.

The pitches (shown as cross-headed) do not indicate the resulting sound but refer to the strings affected by the gesture.

= Card: pluck with the card, always between ruler and bridge, the strings indicated by the cross-headed notes.

= Tapping: strike the strings in the indicated positions with the fingertips. Because of the preparation, the resulting sound will not have a clearly defined pitch and will not correspond in any way to the position in which it was produced.

As throughout the rest of the piece, the notated sounds with stem up will be to be played with the right hand while those with stem down with the left hand.

=Pluck ruler: the round note on three line staff indicates to pluck the ruler with the right hand, which will already be in the position.

= Ruler sliding: move the ruler between the indicated positions.

Variations in dynamics and accents are to be achieved through different sliding speeds.

The small notehead, in parentheses, indicates the target position while the large notehead indicates the beginning of the movement which should be slightly marked.

Piano

- Preparation

- D1 and E1: place a small metal plate (about 10 cm in diameter) on the strings as close as possible to the capo bar, so as to cover the strings of the two pitches indicated and, of course, the surrounding strings. The plate should be rather light so that it does not completely stop the vibration of the string and that it rises up creating small bounces if the two pitches are played on the keyboard in sforzando. The result will be a tuned sound, in which the pitches will be audible, but at the same time metallic and having a strong inharmonic and irregular component.

- B1: Insert two erasers or tuning wedges between the strings, one very close to the keyboard, the other about halfway up the strings.

- F2: insert one eraser or tuner wedge about 2/3 of the way up the string. For both preparations avoid the production of harmonics; this will result in two percussive sounds with distinct timbre and no clearly perceptible pitches

- B6 and F7: mute the strings by applying adhesive paste (patafix).

- Tools (card)

A hard plastic card is needed, like a credit card.
The card will be used in two ways:

Percussion: Strike the strings, positioning the long side cutting and oriented perpendicular to the direction of the strings.

Scrape: Scrape the strings, or the black keys of the keyboard, moving quickly in a perpendicular direction relative to the strings, always from low to high. Scraped sounds should always be played as fast as possible.

Different durations are due solely to greater clarity of reading. To achieve different dynamics change the pressure and force with which the board is held.

- Notation

Prepared notes: notes prepared with wedges and adhesive paste are shown with a square head

Card:

Percussive and scraping sounds performed with the board are produced in three different sections shown below.

Given the wide variety of frame shapes and structures among even the most popular pianos, these sections are shown only as examples. For performance purposes, it is necessary to identify an area related to the middle range of the instrument (A), one related to the mid-high range (B), and one related to the very high range where strings without dampers are present (C).

The sounds produced by the card are indicated on a three-line staff; each letter refers to the area in which it is to act: the keyboard (T) the strings sections (A) and (B).

The section (C) which is used only on a few occasions in the final part of the piece, does not have its own staff but is indicated locally.

Pedals: The sustain and sostenuto pedals, except when noted "soundless," are always pressed and released in a fast and dry way, resulting in percussive sounds of different dynamics. Open slur means: leave the pedal down until the next release indication.

↓ = Press pedal

↑ = Release pedal

↑
sfz = Sforzato release: abruptly release pedal by sliding the foot off

Amplification

Depending on the properties of the performance space, the piece may be amplified, as long as the amplification preserves acoustic sound quality as much as possible and does not alter dynamic relationships between instruments.

Detailed description of the musical score: The score is for measures 66 through 72. It features three staves: Bass Clarinet (B. Cl.), Violoncello (Vc.), and Piano (P.no).
 - Measure 66: B. Cl. starts with a half note *f*, followed by a quarter note *mf* with a 'slap' instruction. Vc. has a half note *mf* with 'L.H. (fing. 2, 3, 4)' and 'arco betw. ruler and tast.' instructions. P.no has a half note *sfz* with '8ba' and a '5:4' time signature change.
 - Measure 69: B. Cl. has a half note *ff*, followed by a half note *pp*, a half note *mf*, a half note *pp*, and a half note *f*, ending with a half note *p* and 'flatt.' instruction. Vc. has a half note *f*, followed by a half note *sfz*, a half note *sfz*, a half note *mf*, and a half note *f*. P.no has a half note *sfz* with '8ba' and a '5:4' time signature change.
 - Measure 72: B. Cl. has a half note *ff*, followed by a half note *pp*, a half note *mf*, and a half note *f* with 'slap' and 'flatt.' instructions. Vc. has a half note *sfz*, a half note *sfz*, a half note *sfz*, and a half note *mf* with 'betw. ruler and tast.' instruction. P.no has a half note *sfz*, a half note *sfz*, a half note *5*, and a half note *sfz* with '8ba'.

This musical score excerpt covers measures 153 to 157 of 'The Great Gate of Kiev' from the 'Symphony No. 2' by Igor Stravinsky. The score is written for five instruments: Growl (Bass), B. Cl. (Bass Clarinet), Vc. (Violoncello), P.no (Piano), and Ped. (Pedal). The key signature is one flat (B-flat major/D minor), and the time signature is 3/4. The score includes various musical notations such as notes, rests, dynamics (ff, sfz, molto pont.), articulation (accents, slurs), and performance instructions (growl, flaut., drop bow). The piano part features a triplet in measure 154 and a sequence of chords in measures 155-157. The growl part has a 'real notes (8va if too low)' instruction. The B. Cl. part has a 'flaut.' instruction. The Vc. part has a 'drop bow' instruction. The Ped. part has a 'sfz' instruction. The score is marked with measure numbers 153, 154, 155, 156, and 157.
